

**WE OPPOSE**  
**RIVIAN**  
**ASSEMBLY PLANT**

**Morgan, Walton,  
Newton, Jasper,  
& surrounding areas**

**No2Rivian.org**

Dear Fellow Georgians and Friends:

A new and unproven electric-vehicle company called Rivian intends to build the largest truck/auto assembly plant in the United States (20 million square feet on 2,000 acres) in Morgan & Walton counties adjacent to Newton and Jasper counties. If approved through zoning and environmental reviews by our county commissioners, zoning boards, and other officials, this gigantic plant will forever destroy our small towns, rural life & natural environment. Rivian has already gotten options in secrecy through our four-county Joint Development Authority (JDA) on thousands of acres of rural land just outside our small towns of Madison, Rutledge, and Social Circle. The JDA is seeking waiver of environmental impact studies before rezoning in order to circumvent environmental constraints until too late for the public to object. With the barest of public notice, the JDA is undertaking to commence rezoning for industrial use now, thankfully delayed for a few weeks due to our efforts.

Above is the existing Rivian plant in Normal, Illinois. It is less than 20% the size of Rivian's proposed plant in our wonderful Georgia countryside.

Please help save our small towns, rural life & natural environment! Make your views known immediately! Act now! Say NO to Rivian!

For details on Rivian's plans and how you can help to stop them, [please click here to go to our website: No2Rivian.org](https://No2Rivian.org)

Yours sincerely,

Concerned citizens who have joined together as:  
Morgan Land, Sky & Water Preservation, Inc.
